Subject: Notice in Accordance with TSCA Section 8(e): Results of a toxicity study on aquatic water plants (*Lemna gibba*) with an experimental pesticide

Dear Section 8(e) Coordinator:

[REDACTED] is submitting results of a toxicity test with [REDACTED] on aquatic water plants (*Lemna gibba*), conducted by [REDACTED] (NON-GLP Indicator Study). The test substance is an experimental pesticide.

The test was conducted in a static system over 7 days according to the following test guidelines:
"OECD Guideline for Testing of Chemicals, No. 221: *Lemna* sp., Growth Inhibition Test

The following nominal concentrations were tested: **control, 0.1, 0.4, 1.6, 6.4 and 25.6 µg/L**. All test solutions were visibly clear over the entire exposure period. The test substance is an active ingredient. Analyses were not carried out.

The following effect concentrations were obtained based on nominal concentrations:

Growth rates based on frond number

NOEC	=	0.40 µg/L
E _r C ₁₀ (7 d)	=	1.45 µg/L
E _r C ₅₀ (7 d)	=	3.30 µg/L

Growth rates based on biomass

NOEC	=	0.40 µg/L
E _r C ₁₀ (7 d)	=	>0.40 µg/L *
E _r C ₅₀ (7 d)	=	3.88 µg/L

Yield based on frond number

NOEC	=	0.40 µg/L
E _y C ₁₀ (7 d)	=	1.09 µg/L
E _y C ₅₀ (7 d)	=	2.42 µg/L

Yield based on biomass

NOEC	=	0.40 µg/L
E _y C ₁₀ (7 d)	=	>0.40 µg/L *
E _y C ₅₀ (7 d)	=	1.22 µg/L

Explanation:

The **NOEC** is the highest concentration tested with no statistical significant deviation compared to the control

The **EC₅₀** is the concentration calculated at which the growth rate "r" resp. the yield "y" is inhibited by 50%.

* = The endpoint was determined by expert judgement based on raw data evaluation because the statistical evaluation was not rational.
